

COMMON OPERATING ARCHITECTURE

Your mission. One task. Visible proof.

Use the same control loop in every role

IRON MAN
MODEL

You are learning to wear Codex like an Iron Man suit. You provide the mission and judgment. Codex performs approved work through a controlled autonomous loop.

You decide	Codex may do	Codex must stop
Mission, priority, approvals and final judgment.	Research, plan, create, check, document and continue approved work.	Access, Gate 0, spend, publication or another owner decision.

PROJECT RULE

The public v1.3.0 repository supplies clean system/reference files. Record real work only in your separate private or local project.

Name:

Role:

Work-project path shown in Codex:

Named prompt file: people/

KNOWN ROLE PROMPTS

Open your own file; do not inherit another lane.

If your name is absent, use ALL-EMPLOYEES and the universal homework

Prompt	Use
anupam.md	Anupam's named rows only
astha.md	Astha's named rows only
deepu.md	Deepu's named rows only
interns.md	Assigned intern rows only
rohan.md	Rohan's named rows only
satyam.md	Satyam's named rows only
shadab.md	Shadab's named rows only
sunaj.md	Sunaj's named rows only
trusha.md	Trusha's named rows only
vikash.md	Vikash's named rows only
ALL-EMPLOYEES.md	Common architecture + fallback homework
SETUP-HELPER.md	Setup/recovery lane; not a role mission

RULE ONE TASK

Write the mission before the work starts.

A vague mission is not permission

Task ID: _____

Result wanted: _____

Approved sources: _____

Approved tools/accounts: _____

Allowed action: ☐ Read only ☐ Draft only ☐ Edit approved local files ☐ Other approved: _____

Batch size (maximum 25): _____

DONE WHEN visible proof:

Undo/recovery: _____

GATE 0

Medical claims, dosage, certification, legal text and spend are flagged, never fixed. There is no override.

MID-TASK IDEA

Capture it as a new OPEN_REGISTER.md row. Do not execute it inside the live task.

SESSION CLOSE

Changed is not done.

Attach proof, close the row and leave the next state clear

- ☐ The artifact or result exists where the mission said it would.
- ☐ The evidence log records the source and visible proof.
- ☐ The completed row is in COMPLETED_LEDGER.md.
- ☐ The row is removed from OPEN_REGISTER.md.
- ☐ MASTER_CURSOR.md names what is next or is clear for Abilash.
- ☐ No open work was hidden; each blocker has one line and one owner.
- ☐ Any system update or skill removal happened only at a safe checkpoint.

Evidence location/link: _____

One open blocker and owner: _____

Employee final judgment: ☐ Accept ☐ Revise ☐ Block
